Top Skills

Factor Analysis

Monte Carlo Simulation

Apache Spark

Yu-Hsin Huang

Ex-Micron Data Science Intern | MS @UMich Data Science | Actively
seeking 2026 Data Science Full-Time
United States

Experience

University of Michigan

Graduate Research Student

January 2025 - Present (1 year 3 months)

- Implemented simulation frameworks to evaluate 8+ regularization and rotation methods for sparse structure recovery
- Identified Lasso reduced MSE by 10% compared with other methods in high cross-loading factor structures

Micron Technology

Data Science Engineer Intern

July 2025 - August 2025 (2 months)

Taiwan

- Developed a ResNet-based deep learning model for manufacturing defect prediction on time-series sensor data, improving R2 by 17% through hyperparameter tuning and architecture refinement
- Built scalable data pipelines for 10M+ sensor records from BigQuery to support large-scale predictive modeling
- Performed exploratory data analysis on large-scale datasets to identify anomalies and inform feature engineering
- Applied permutation-based feature importance analysis to identify key features, reducing RMSE by 4% and improving interpretability for engineering teams

National Chengchi University

Research Assistant

July 2022 - August 2024 (2 years 2 months)

Taipei, Taipei City, Taiwan

(1) Financial Time-Series Analysis: Oil Price and Petrochemical Volatility

- Developed a hybrid quantitative framework to model volatility transmission across the petrochemical value chain.
- Analyzed 10+ years of multi-market price data to quantify time-varying volatility and directional spillovers.

- Translated cross-market dependencies into actionable insights for portfolio and supply-chain risk mitigation.

(2) E.SUN Foundation Taiwan's English Education Project

- Analyzed 10K+ student learning outcomes across schools to support data-driven curriculum and resource planning.
- Evaluated the impact of an education program across treatment and control schools, using ANOVA and paired t-tests to identify a 3.2% improvement in learning outcomes

Education

University of Michigan

Master of Science - MS, Data science · (August 2024 - June 2026)

National Chengchi University

Bachelor's degree, Statistics · (July 2020 - June 2024)
