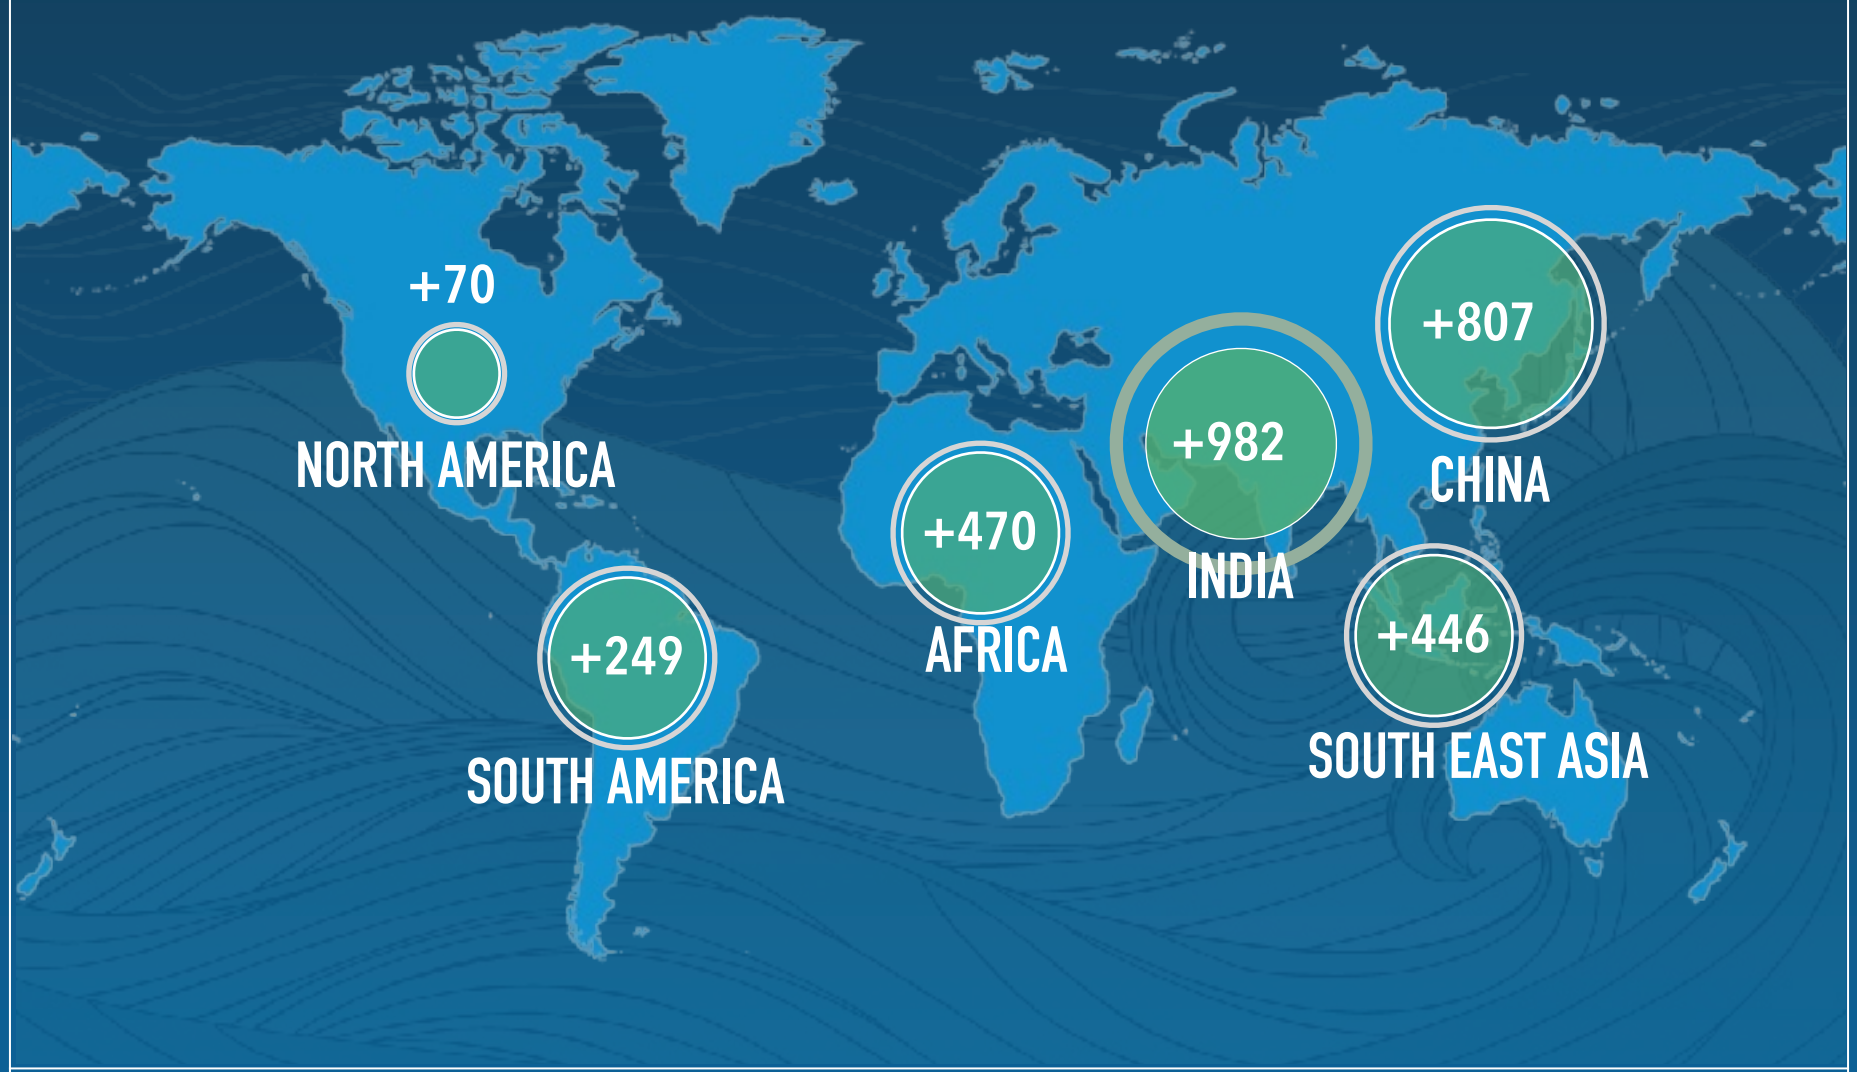
GROWTH IN ENERGY DEMAND AROUND THE WORLD: 2017 - 2040

According to the International Energy Agency, improvements in energy efficiency and use of lower-carbon energy sources will help moderate energy demand in developed nations. However, population growth and improved standards of living will drive increased energy demand, especially in Asia.



Today's investors will be at the forefront of the next 100 years of growth

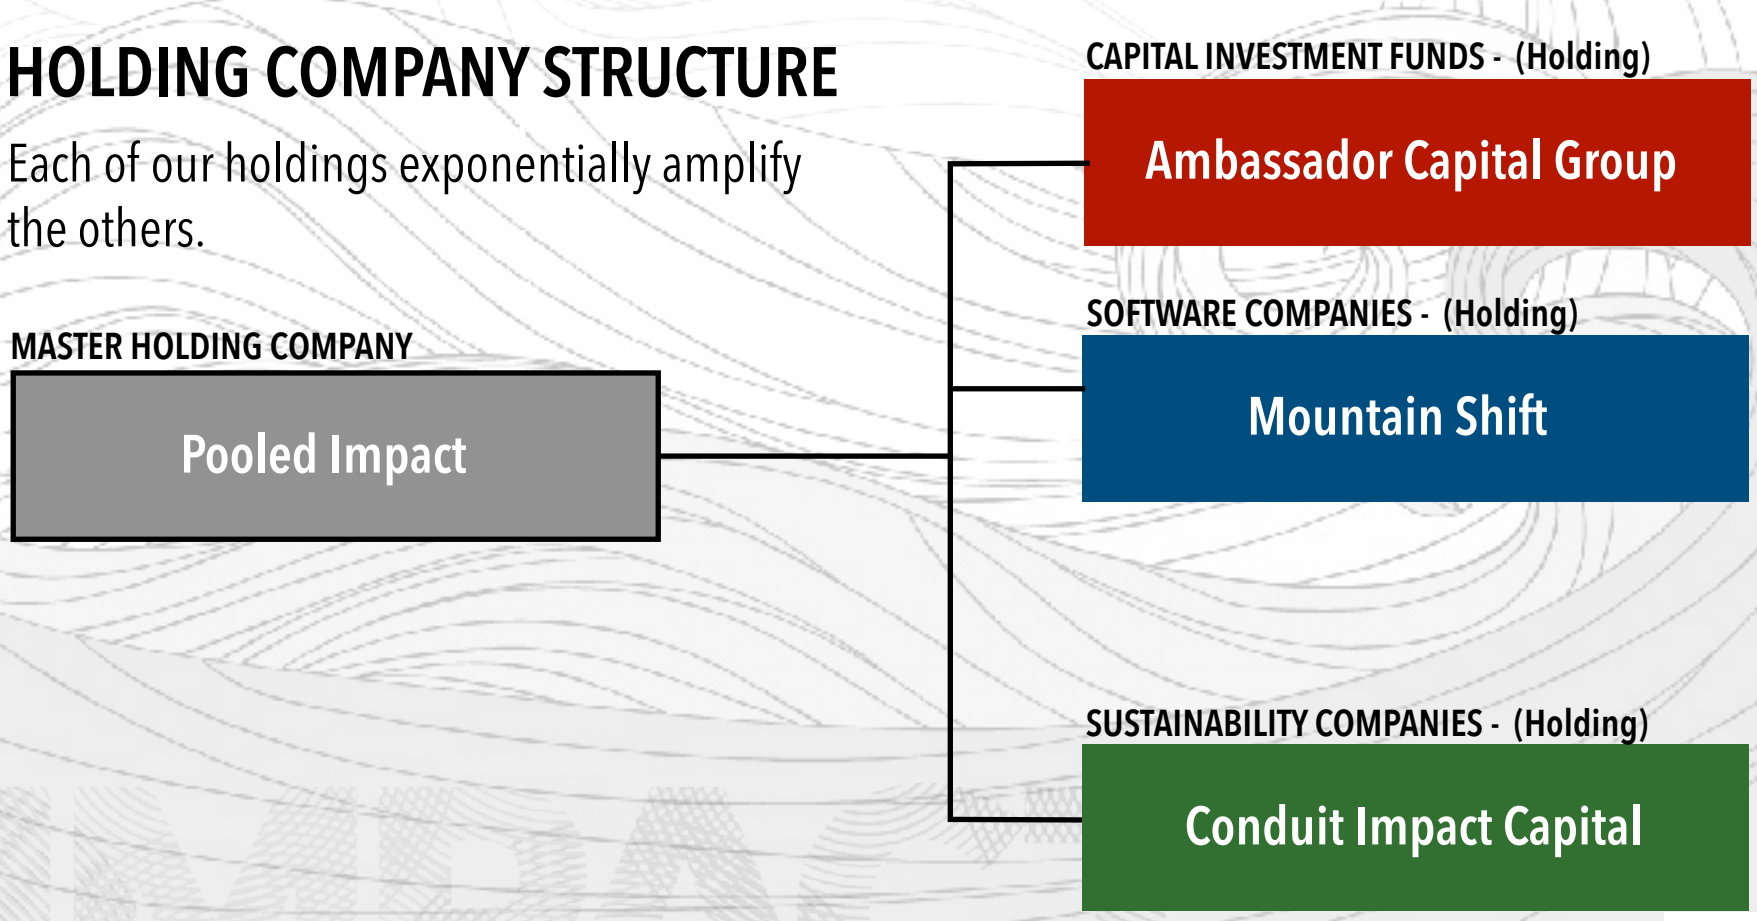
OVERVIEW

From affordable housing to clean drinking water to equitable energy, we need a spark plug in our society to get our human flourishing engine perpetually moving. Pooled Impact is that spark that seeks out impact solutions that **leverage market forces** and **robust financial solutions** to create **sustainable systems.**

HOLDING COMPANY STRUCTURE

Each of our holdings exponentially amplify the others.



POOLED IMPACT

Pooled Impact is pioneering a Restorative Economic Model

OUR IMPACT-FIRST APPROACH STILL SUPPORTS ROBUST INVESTOR RETURNS

1 SUSTAINABLE VALUE CREATION

Focused on long-term value creation. We are motivated to improve and grow basic need systems: Housing, Energy, Water, Air, Health in the US and the Global South.

2 ABUNDANCE MODEL

We strategically are making life-changing IP available to different global stakeholders, rather than siloing it.

3 POSITIVE-SUM ECONOMICS

The total wealth of consumers, businesses, and investors will increase as quality of life improves in the US and the Global South.

THE RESTORATIVE ECONOMY

To see how we're ensuring economic justice + strong investor returns, see our Restorative Economics deck.

POOLED IMPACT

DISCOVER:

Acquire IP and equity on favorable terms from businesses, scientists and inventors inspired to accelerate global impact of their assets.

DEVELOP:

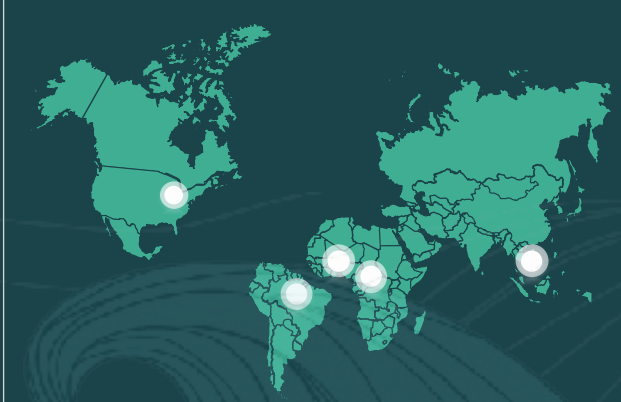
Local partnerships to de-risk programs with small-scale trials and pilots in heavily divested areas to at lower costs.

DISTRIBUTE:

Licensing to the Global North, while preserving access to the Global South.

1. We acquire IP and strategic equity positions from scientists, investors, and innovative businesses across the world.

2. Deployment strategy in historically divested areas realizes a significant const savings that is passed on to investors.



3. We obtain regulatory approval in the global north for distribution, out-licensing via public/private partnerships in the Global South.

AFFORDABLE HOUSING MARKET

$84.7B

The affordable housing market was valued at approximately $52.2 billion in 2021 and is projected to reach $84.7 billion by 2031, growing at a rate of 4.9% annually. This growth is driven by increased government investment and the rising demand for affordable housing options.

2024 GLOBAL SOLAR MARKET

$201.7B

The global solar energy market was valued at approximately USD 201.7 billion in 2024 and is projected to grow to USD 590.8 billion by 2033. Meanwhile, the wind power market was estimated at USD 97.05 billion in 2024, with a projected growth rate of 4.9% from 2025 to 2030.

PIPELINE: 1st Asset - Affordable Housing

ASSET PROFILE:

NEXT GENERATION AFFORDABLE HOUSING FINANCE TECHNOLOGY

Unique Bond, Predevelopment, and Guarantor financial products augmented by scalable pipeline of projects. Projects are further augmented by technology such as the following: solar, modular, EV charging stations, energy production and software.

Key Milestones:

- 2024 - Innovative Predevelopment Gap Financing as highlighted on the cover of the Miami Herald
- Q2 2025 - Bond Product Pilot
- Q1 2025 - Assessment Team Deployed

Growth - Investment Milestones:

- Further accelerate Bond secondary funding with QSIPs
- Predevelopment Gap Financing at scale
- Assessment automation through AI and bots

PIPELINE EXPANSION: - EQUITABLE ENERGY

ASSET PROFILE:

NOVEL GENERATION ENERGY TECHNOLOGY

Monetize inputs and outputs that are defined as "free" in many cases are negative and harmful byproducts of industry by restoring into usable formats. A few examples are as follows:

- Solar - Input; Restored into Energy
- CO^2, Methane - Output; Restored into Energy

Key Milestones:

- Acquired 175 square miles in Zimbabwe
- Finalizing Solar Factory Partnership
- Finalizing Community Development Project Partnerships with Hydrogen generation technology to increase payout for Sponsors.
- Beginning stages of discussion with GoogleX for proprietary IP

Growth - Investment Milestones:

- Pilot CO^2, Methane, and Ammonia conversion to Synthetic Diesel and E-Kerosene(Jet Fuel) to augment transportation IP and global distribution partnerships.
- European CO^2 and Methane partnership licensed and/or acquired.
- Integrate technology into shovel ready projects in Ghana/Togo and finalize project agreements in Start project implementation in Pacific Islands.
