Dr. Tadiwanashe Muganyi

Economist | Investor

The Hague, South Holland, Netherlands

Summary

I am Dr. Tadiwanashe Muganyi, an industrial economist and fintech expert with a passion for understanding the impacts of emerging technologies on the financial landscape and society at large. My work, which spans across Asia, Africa, and Europe, combines academic rigor with practical insights at the intersection of finance and technology.

Holding a PhD in Industrial Economics, my research focuses on the effects of fintech on financial development. I also hold an MSc in Global Central Banking and Financial Regulation, a joint initiative by the Bank of England and Warwick Business School, where I took a deep dive into the intricacies of AI fintech advancements and their implications for bank risk in the Eurozone.

I am deeply committed to the potential of digital transformation to foster inclusive and sustainable development. My academic contributions, including an extensively cited paper on fintech and green finance, have been recognized for their alignment with the United Nations Sustainable Development Goals.

Currently, work as the Chief Economist at Fintech Edge, leading a team dedicated to uncovering and analyzing the latest trends in finance and technology. In addition to this role, I am also the Managing Partner at Nexcelia Consulting, where I leverage my expertise to assist firms in aligning their strategic goals with insightful, data-driven research and analysis of the macroeconomic climate.

Feel free to connect with me for any collaborations or discussions.

Experience

Nexcelia Solutions B.V

Managing Principal Consultant
March 2018 - Present (8 years 1 month)
The Hague, South Holland, Netherlands

- Digital Lead: Led digital transformation projects for clients in various industries, including finance, technology, and energy, to achieve operational efficiency, revenue growth, and customer engagement. Managed cross-functional teams of consultants, developers, and designers to ensure successful project delivery. Collaborated with clients' C-suite executives and stakeholders to identify business challenges, design solutions, and implement changes.
- Developed deep knowledge and expertise in Fintech, including payment systems, blockchain, and digital currencies. Advised clients on Fintech trends, opportunities, and challenges, and helped them develop and implement Fintech strategies that aligned with their business goals and regulatory requirements. Worked on projects involving digital banking, insurance, and wealth management, among others.
- Helped clients deploy cloud services in new markets, including China and Europe, to improve cost-effectiveness, scalability, and security. Conducted market research, analyzed data, and identified suitable cloud providers and solutions that met clients' needs and preferences. Worked with clients' IT teams to ensure smooth migration and integration of legacy systems.
- Promoted ESG (Environmental, Social, and Governance) principles and practices among clients and within the firm. Conducted ESG assessments, developed ESG strategies, and monitored ESG performance for clients. Collaborated with ESG experts and stakeholders to identify and address ESG risks and opportunities. Participated in ESG-related events and initiatives to raise awareness and build partnerships.
- Communicated effectively with clients and colleagues from diverse cultures, languages, and backgrounds. Worked in Shanghai and The Hague, and developed cross-cultural understanding and sensitivity. Developed marketing and communication materials that resonated with local audiences while maintaining global brand consistency.

Fintech Edge

Chief Economist

April 2023 - Present (3 years)

The Hague, South Holland, Netherlands

I lead a team of researchers and analysts to provide expert insights and guidance to clients on economic trends, market conditions, and other relevant issues.

My responsibilities include conducting in-depth research on economic and financial topics relevant to the fintech industry, developing economic models, making forecasts, and providing recommendations on investment strategies. I also build and maintain relationships with clients, industry experts, and other stakeholders in the fintech industry, attend conferences, speak at events, and network with other professionals.

I take pride in publishing research papers, articles, and other thought leadership pieces on economic and financial topics relevant to the fintech industry. This helps establish our firm as a trusted authority and thought leader in the industry.

I play a critical role in helping businesses stay ahead of the curve by providing expert insights and guidance on economic and financial trends.

Priva

Snr. Business Analyst Strategy & Commerce

October 2020 - November 2022 (2 years 2 months)

The Hague, South Holland, Netherlands

- Conducted data analysis to identify business trends, patterns, and insights from large and complex data sets.
- Worked closely with cross-functional teams to identify areas for business improvement.
- Developed and implemented solutions to drive growth and profitability.
- Led the end-to-end project lifecycle, from scoping and requirements gathering to implementation and post-implementation support.
- Managed projects to ensure they are delivered on time, within budget, and meet business requirements.
- Conducted stakeholder interviews, facilitated workshops, and provided regular updates on project progress.

- Worked closely with internal and external stakeholders to ensure that requirements were understood and expectations were managed effectively.
- Streamlined operations and increased efficiency by developing and implementing process improvement plans.
- Brought a strategic perspective to the table and provided data-driven insights to drive growth and profitability.

East China Normal University

Guest Lecturer

March 2021 - December 2021 (10 months)

- Guest Lecturer in Macroeconomics: Delivered engaging lectures on macroeconomic theory and policy to undergraduate students. Incorporated real-world examples and current events to illustrate complex concepts and foster critical thinking. Received high ratings from students and positive feedback from faculty.
- Program Developer for China Innovation Course: Designed and implemented a 6-week study abroad program in China for undergraduate students interested in innovation, entrepreneurship, and cross-cultural collaboration. Developed curriculum, secured partnerships with local companies and universities, recruited and trained teaching assistants, and managed logistics and budget. Created a supportive and inclusive learning environment that encouraged students to explore their passions, challenge their assumptions, and develop their skills.
- Researcher in International Economics: Conducted empirical research on trade and investment patterns between China and other countries, using quantitative methods and econometric models. Presented findings at academic conferences and published articles in peer-reviewed journals. Collaborated with colleagues from different disciplines and countries to explore interdisciplinary research questions and promote cross-cultural exchange.
- Mentor and Advisor: Mentored undergraduate and graduate students interested in economics, international relations, and public policy. Provided guidance on academic and career paths, research projects, and professional development opportunities. Served as an advisor for student organizations.

China Campus Network
Global Marketing & BD Director
April 2016 - March 2018 (2 years)
Shanghai, China

- Led the development and execution of the company's marketing and business development strategy across multiple regions and channels. Oversaw a team of marketing, sales, and partnerships professionals based in China, Europe, and the US. Worked closely with the CEO and other senior executives to align marketing and BD initiatives with the company's overall mission, vision, and values.
- Developed deep knowledge and insights into the EdTech industry, including trends, opportunities, and challenges. Conducted market research, analyzed data, and synthesized complex information to inform strategic decisions and tactical plans. Stayed up-to-date with the latest technologies, pedagogies, and best practices in EdTech, and shared knowledge and expertise with colleagues, partners, and clients.
- Communicated effectively with stakeholders from diverse cultures, backgrounds, and languages. Built strong relationships with clients, partners, and investors in Asia, Europe, and the US, and facilitated cross-cultural understanding and collaboration. Developed marketing and BD materials that resonated with local audiences while maintaining global brand consistency.
- Set clear goals, KPIs, and targets for the marketing and BD team, and held team members accountable for delivering results. Developed and implemented marketing and BD campaigns that generated leads, increased conversion rates, and expanded the company's customer base. Established and nurtured partnerships with schools, universities, and other institutions to promote the company's products and services.
- Encouraged and supported innovation and entrepreneurship within the marketing and BD team and across the company. Developed new products and services that met the evolving needs and preferences of learners, educators, and institutions. Collaborated with startups, incubators, and accelerators to identify and adopt cutting-edge technologies and business models.
